

Job Description

Title of the position

Electrician

Department

Electrical

Reports to

Electrical Manager

Key areas of responsibility

As an Electrician at Technopak you will be working with a team of mechanical, electrical and controls staff, building, installing, commissioning and maintaining high level equipment around the world.

You will be expected to utilise your mechanical ability as well as your electrical expertise and it is expected that you will enjoy taking ownership of your jobs. You will have the commitment to do what is required to both meet production deadlines and keep machines working on site. Your primary focus while working at Technopak will be the physical build of the electrical equipment, including panel wiring, machine wiring and testing. You will also be called upon to help with documentation for various international standards /compliances and regulations that are continuously evolving to ensure we are delivering the best machinery to industry.

As an Electrician you will be;

- Showing a strong commitment to working within the company's Health and Safety Systems
- Involved in general manufacture, assembly and fitting of our range of equipment
- General checking and testing of equipment manufactured
- Assisting with equipment disassembly ready for packing when required
- Doing on-site installation and support as required
- Understand control systems
- Keep Test and Tag up to date for Technopak appliances, tools, leads etc
- Provide support with building work at Technopak (ie, new power circuits, lighting circuits etc)
- Prepared to work either independently or as part of a team
- Have a commitment to achieve or exceed deadlines
- Able to work to and follow the relevant electrical standards and regulations when performing prescribed electrical work
- Involved in the investigation of various international standards and contribute to the evolving documentation of Technopak equipment.
- Involved in the evolvement of department documentation.
- Working with a high attention to detail for a quality outcome
- Undertaking Solidworks Electrical and Pneumatic drawings

KPI's

- Build electrical panels for Technopak machines to a high standard.
- Build and test electrical equipment in suitable time frames.
- Willingness to get involved in all aspects of the work available to you.

It is expected that you will have to do some travel for service and installation purposes
