

Job Description

Title of the position

Workshop Fitter

Department

Workshop

Reports to

Workshop Supervisor

Key areas of responsibility

Technopak specialise in the design, manufacture and installation of Packaging Machinery and associated equipment for the worldwide Dairy Industry. As a Workshop Fitter, your main responsibility will be building top quality machines, you will be working with our established workshop staff undertaking some fabrication and machining work but primarily assembling equipment. You will be expected to build equipment to an agreed timeline to the highest quality level.

You will also then be involved in the installation and commissioning of the equipment both in NZ and around the world and make yourself available for Service work in NZ and overseas as required.

As a Workshop Fitter you will;

- Build and assemble machines and equipment to suit accurate, high hygiene applications
- Undertake pneumatic systems build and fault find
- Work from drawings and 3D models as used in our production facility
- Clearly, through the "mark-up" process, document required changes to existing drawings
- Assist with the up-skilling of all staff and training of apprentices
- Ensure compliance with Technopak's quality standards
- Have a commitment to meet deadlines
- Demonstrate a positive, enthusiastic, committed and flexible attitude towards other team members, recognising the importance and benefits of effective team working
- Maintain a clean Driver's License and Passport to enable travel
- Be prepared to travel and undertake both maintenance/service and installation work on NZ and international sites.

KPI's

- Commitment to do the work required on the equipment and machines built to meet deadlines at the required quality, measured through workshop non conformances
- Working within and active involvement in company Health and Safety systems and incident reporting
- Availability to assist with the service and installation work, nationally and internationally

It is expected that you will have to do some travel for service and installation purposes
